Rationale

01 To enable girls to cross barriers caused by cultural and gender norms that prevent them from articulating their needs.

02 To guide girls in having safe and acceptable access to appropriate healthcare information so as to make informed decisions.

03 To provide knowledge to girls about the anatomy and physiology of their bodies because changes in these affect their reproductive health.

04 Providing right and timely education to the young girls to prepare them for building healthy lifestyles that can protect & improve their menstrual & reproductive health.
