Before the curtain raiser...

The journey of building an enduring academic system is a long-term and non-linear exercise consisting of a series of decisions, actions, learnings and pivots. In its quest to become enduring, often, an organization's sense of its true capabilities subjectivities, external perceptions, requirements of stakeholders and many such parameters need to be perceived clearly, well in advance. Each Level of attainment brings with it new academic challenges. An organization's journey across these levels entails effective implementation of key practices, and their disciplined assimilation in the organisation's culture.

When we launch a new system, it is imperative that myriad questions are bound to crop up. Yet we can build something better by partnering with purposes which are values-driven, authentic and aligned with the contemporary needs of the society. Even a disrupted time like the pandemic is actually a great time to develop a novel offering, because it accelerates shifts which otherwise are unpredictably slow. We do not walk with both feet at the same time, we take one step and then the other follows naturally and the journey begins to take shape.

Hybrid work has seen a pronounced surge, particularly amid the Covid-19 pandemic, and it's only going to continue perhaps by an even higher degree. If we're sure about how to navigate a hybrid work environment, it makes the transition that much easier. To effectively manage a hybrid environment, we need to make use of the right tech platforms and optimum technologies. We need to maximize our 'thought-action' footprint. One of the best ways to build our platform is to have a thoughtful, sustained presence.

There may be so many un expected vulnerabilities around each activity we plan to take up. Different circumstances call for different modes of operation. It demands total dedication and a sense of complete and continuous awareness. The Mind with reason and the Soul with compassion must be united in decision-making. Clarity and coherence are the buzz words for all next gen ventures.
