Principal's Desk

The world is shrinking, the intensity of competition is increasing, and uncertainties are mounting. Managing competition and livelihood issues of the people are getting paramount importance. At this juncture, it is advisable to forecast the changes and prepare strategies to combat the competition. As competition is embedded with uncertainties, formulating strategies to survive and grow is a tremendous task, as well as the responsibility of the policymakers and the people involved in the developmental works.

Being in the education sector, we have a greater responsibility to assess the change and to predict the modalities to combat the competition in terms of assuring stability in alternative sources of revenue generation and establishing stability in the livelihood issues.

Dr. P.N. Udayachandra

Principal

Karnataka Kreedha Poshaka Award - 2022
