Best communication

Visiting

It would be great if we were given seminars by faculty/ experts from other countries or states for better exposure to the subject.

The professors are excellent in involving students in learning.

If teachers can introduce or give a small lecture on experts/ pioneers in the field, it would garner more interest in students.
Have an update on teaching skills of teachers
My opinion is that Institution provides best to the students.
Focusing more on teaching innovatively Teaching subjects in a way the students crave for extra knowledge and sprout interest Focusing more on education rather than student dress codes.
Conduct some activities in classes regarding subject matter
They should give importance to workshop, industry visits. more advanced practical session should be held.
Tablets provided to use at library are outdated and need to be upgraded. Seminar halls present are not sufficient to host any big fests or programme, there is a need for bigger seminar hall . Feeling proud to be studying in this great institution.
Want to make some types of activities in the class about the subject. Other than ppts should concentrate on other methods.
Should guide us about the internship and also field visit. Should demonstrate the programs in computer instead of writing it on board. And activities should be conducted in class atleast for once in a while.
Should utilize visual teaching instead of using boards, should give certain information about internships, job offer.
1. Teaching is good and understandable. 2. Few of the lecturer give information about the future life and the career opportunities. 3. The overall opinion about the college is good, but sometimes the students who are innocent also get punished because of other students' behavior.
We Need A Campus Selection for (PG Students) For all MS.c courses We Need Extra Curricular Activities, We need less theory, Heavy Practical Work
Teach the subjects out of syllabus which will help at least some students who are in quest of subject knowledge.
1. Tell students sometimes out of subject matter 2. Tell them about internship and encourage them to go

As far now, I don't have any specific suggestions to improve learning experience in our college. All the facilities are provided to facilitate a student's learning experience. Library is good and it has lots of facilities, teaching is also good, mentors identify the students who are poor in academics and guide them.
Conduct some conferences and good workshops interacting with resource persons
Our college is providing all required facilities to students.
I am very proud to be the part of SDM and we have the best learning experience. my suggestion is that we have, but I want more and more alumni interactions or career guidance programmes from every subject.

1. The teaching level we're getting in college is okay, as a student I don't think it is up to expected quality. 2. Apart from teaching there is so much to do like co-curricular activities and I don't think we're encouraged enough as much as a student should. 3. Only some selected people get the chance to participate in everything, other students won't get to show their talents.
Making partiality between boys and girls.. Some of the lectures did that

Our institution has a best education system so I don't think it needs to improve because it is much improved.

Some slow learners couldn't catch up things quickly during class. So instead of saying everything twice in the class for them it is better to upload material previously a day or two days before discussing the topic. When students come prepared for the class as teachers do it makes class more interesting and help to clear all the doubts than just directly jumping into new concepts without any idea about it.
