The department also emphasizes on the employability by organizing student-industry interactions, pre-placement training, interview simulation, industrial visit and campus recruitment.

## About the conference

The International Conference on Innovations in Chemistry: Materials and Medicines for Sustainable Society (ICMMSS-2025) serves as a pivotal platform for researchers, academicians, industry delegates and students to convene and engage in transformative ideas that bridge the field of basic chemical research and practical applications.

As we gather to explore the frontiers of chemical science, we acknowledge the profound impact that innovations in chemistry can have on creating sustainable solutions for society. From the design of novel materials that reduce environmental footprints to the discovery of new medicinal compounds, the contributions of chemistry are integral to addressing global challenges such as climate change, public health crises, and resource scarcity. As we embark on this journey from molecules to materials and medicines, we aspire to inspire new ideas and forge partnerships that will lead to a better, more sustainable world for generations to come.
