

Principal's Desk

In today's world, it has become increasingly important for an individual not only to gain knowledge through systematic study but also to develop the ability to apply that knowledge as a skill. Knowledge, when left unused, remains incomplete. True learning is achieved only when knowledge is translated into practice.

To illustrate, one may learn everything about a car and its functioning by reading a manual. Yet, it is only by actively driving the car that a person experiences complete learning. In the same way, education without application fails to prepare us for real-life challenges.

At our institution, we aim to provide our students with both knowledge and skills, thereby enhancing not only their career prospects but also their personal growth. Our faculty members remain committed to upholding the vision and mission of the college by equipping students with the competence, confidence, and values needed to succeed in life.

It is our belief that the blend of knowledge and skill leads to true education, shaping students into responsible and capable individuals for the future.

Prof. Vishwanatha P

Principal

Programmes Organised
